Notes

Just a simple beachdive, should have brought lights though as the sun set just as we entered the water, we gave it a shot since we were geared up. But after 25 minutes and everything getting darker, we decided to surface, check the the heading and start to head back again. Notice the extreme temperature layers, this was a open water dive, so quite drastic temperature change.

Ended the dive with a piece of cake and a ice cold beer .. awesome :D
